

BowTie Server

enterprise barrier management

Industry Technical Session April 10th 2018 - Adelaide

Are you ready to take risk management to an enterprise level? With BowTieServer you can centralize risk data and provide a dynamic risk picture giving an up-to-date overview of the state of your barriers.

Would you like to learn more about the capability and features of BowTieServer? RPS and CGE Risk Management Solutions invite you to attend the upcoming Industry Technical Session, dedicated to sharing knowledge and networking. An unique opportunity to hear all about the roadmap for the future of this software solution. By means of interactive sessions and Q&A you will become acquainted with all BowTieServer modules.
